

## Notice

### Drafts of Proposed Changes for Updated & Amended Assessment Report for the Essex Region Source Protection Area

The Essex Region Source Protection Committee invites the public to review and comment upon proposed changes to assessment reports for the Essex Region Source Protection Area. Assessment reports are required under the Ontario Clean Water Act, 2006 for each source protection area in the region.

**The “Updated” components of the Proposed Assessment Report consist of new information including:**

- Delineation, vulnerability scoring and threats assessment of Type 3 Intake Protection Zones (IPZ-3s) for some water treatment plants
- Identification of existing significant threats through events-based threats modeling and establishing potential significant threats criteria.

**The “Amended” components consist of revisions to the Proposed Assessment Report completed in May 2010, including:**

- Revised delineations of Intake Protection Zones 1 & 2 for Windsor and Amherstburg water treatment plants, resulting in a reduction in affected areas
- Confirmation of existing significant threats previously identified, resulting in a reduced number of these sites
- Revised water budget results (water quantity stressed watersheds)

Copies of the drafts, including proposed changes can be found at:

[www.essexregionsourcewater.org](http://www.essexregionsourcewater.org)

and at the Essex Region Conservation Authority, 360 Fairview Avenue, Suite 311, Essex

**Submit a comment in writing:**

You can submit a comment in writing:

- Fax: 519-776-8688
